## This Is Why Some Subscribers See 100%+ Gains

Hi, Matt McCall here,

Let me show you something most subscribers don't realize.

Some of my biggest winners...

Don't come from **The McCall Letter**.

They come from a different level of research.

A place where I focus on *earlier-stage, higher-upside opportunities* most investors never see.

Inside that research, we've recently seen:

- A small-cap copper company up over 225%
- Two nuclear power stocks up triple digits flying and under the radar
- An energy company up over 100%
- And a brand-new 6-stock portfolio already up over 30% in less than a month

That's not luck.

That's what happens when you get positioned before the trend becomes

obvious.

And here's the key point:

**None of those ideas were in The McCall Letter**

Because they don't belong there.

They're earlier, less crowded, higher potential... and yes, higher risk.

That's exactly why I created ***Early Opportunities***.

This is where the big money is made. Not after a stock is already up 50%... Not when it's being talked about on CNBC... But when it's still under the radar.

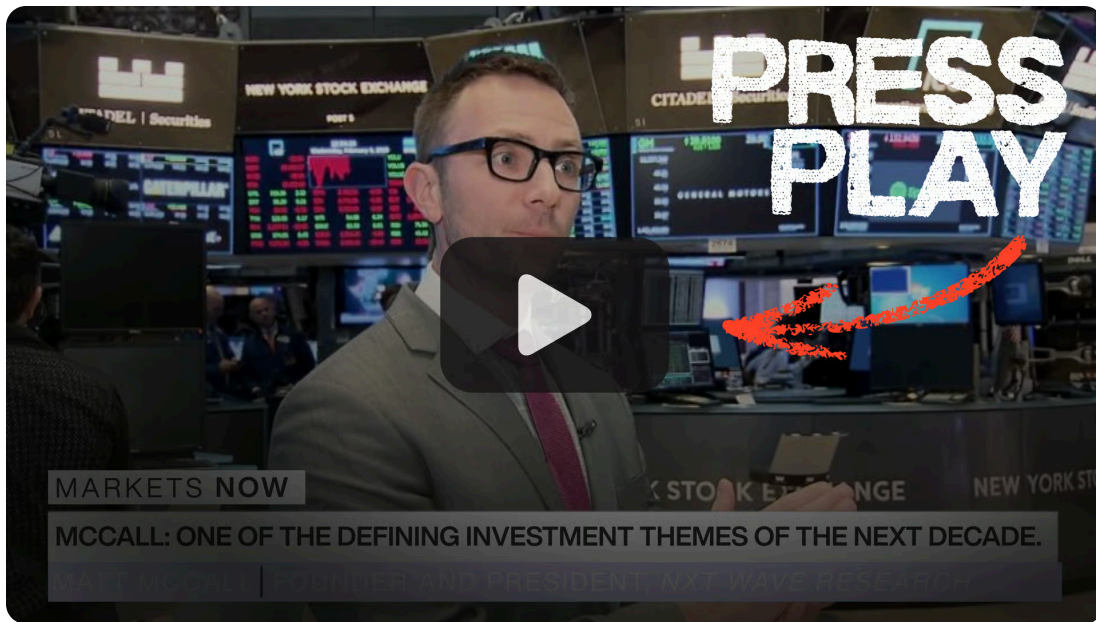

Right now, I've identified 6 new small-cap stocks tied to what I believe is the next major market shift

These are companies most investors ***haven't discovered yet***, sitting right where capital is starting to move. And right now, they are positioned for the kind of upside you simply don't get in large caps.

I just recorded a full presentation breaking it all down:

- The exact trend that all the stocks are tied to
- Why the rotation is starting now
- And the 6 stocks I'm targeting

***Watch The Full Presentation Below:***

Look, there are two types of investors...

1. The ones who hear about big winners after the fact
2. The ones who are already in before the move starts

**Early Opportunities** is for the second group.

If you stay only in The McCall Letter, you'll still get solid ideas.

But if you want access to the kinds of opportunities that can move 100%... 500%... even more...

This is where they come from.

Matt McCall

P.S. The difference between a 20% gain and a 200% gain is almost always timing. These are the types of opportunities that show up early - and don't stay that way for long.
